Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40 – 45 and 52 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,991,277 (Maeng et al.).

With respect to claims 40 – 45 and 52 note Figs. and see Col. 7, line 44 - Col. 8, line 16 and Col. 4, line 62 – Col. 5, line 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 46 - 51 and 53 – 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maeng et al. in view of U.S. Patent No. 5,841,763 (Leondires et al.).

With respect to claims 46 – 51 and 53 - 54 Maeng et al. teach the claimed system, software and method except for the DTMF aspect of the present application. However, Leondires et al. teach such (note DTMF detection 270). It would have been

obvious to one of ordinary skill in the art to have DTMF detection in order to lessen any DTMF interference to the conference.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent No. 5,889,851 (Hsich) – note Figs. and Abstract;

U.S. Patent No. 5,768,263 (Tischler et al.) – note Abstract; and

U.S. Patent No. 5,495,522 ((Allen et al.) – note Abstract.
